Disclaimer

Some of the information in this presentation may contain projections or other forward looking statements regarding future events or other future financial performance. We wish to caution you that these statements are only projections and those actual events or results may differ materially. In reviewing, please refer to the documents that we file from time to time with the SEC, specifically to our annual report on Form 20-F. These documents contain and identify important factors that could cause the actual results to differ materially from those contained in our projections or forward looking statements, including such risks as difficulties in being a marginal producer of gold, changes and reliability of ore reserve estimates, gold price volatility, currency fluctuations, problems in the integration of operations, exploration and mining risks and a variety of risks described in our annual report on Form 20-F. We undertake no obligation to publicly release results of any of these forward looking statements which may be made to reflect events or circumstances after the date hereof or to reflect the occurrence of unexpected results.

Cautionary Note to U.S. Investors: the United States Securities and Exchange Commission permits mining companies, in their filings with the SEC, to disclose only those mineral deposits that a company can economically and legally extract or produce. We use the term "resources" (which includes "measured", "indicated", and "inferred") in our presentation, which the SEC guidelines strictly prohibit us from including in our filing with the SEC. U.S. Investors are urged to consider closely the disclosure in our Form 20-F, File No. 0-28800, available from us at 45 Empire Road, Parktown, Johannesburg, 2193, South Africa. You can also obtain this form from the SEC website at <http://www.sec.gov/edgar.shtml>

Australasian strategy

- **Aim to become mid-tier 400 000 oz/pa producer**
 - Continue strategy of consolidating pre-owned mines
 - Focus on acquiring producers rather than explorers
 - Key targets in the Rim of Fire
 - Identify mines with growth opportunities and depth potential (circa 100 000 oz/pa)
 - Capitalise on DRD's technical and operational expertise

Australasian opportunity

Australasian gold companies by 2002 gold production
