Regenerating communities

Building sustainable livelihoods

Over 7 800 households across the **City of Ekurhuleni, City of Johannesburg and Merafong City** have benefitted from DRDGOLD's sustainable livelihoods programme (the Broad-Based Livelihoods (BBL) programme). In the face of rising inflation, negative effects of COVID-19 and load shedding, BBL families are more economically resilient - able to provide reliable healthy nutrition for their families, expand their economic livelihoods while pursuing their dreams towards a better future.

Over **750 vegetable tunnels** have been constructed since 2018

The DRDGOLD BBL has grown local economies **from the bottom-up** through mass activation and participation of households into the economy.

The various sub-programmes of the BBL enable people to start a diversity of activities from micro-agriculture, to manufacturing, to trading and supply within local communities according to the market demand.

This results in an increase in the injection and circulation of funds within the local economy, thereby **growing that local economy.**
